

# Loops and Arrays

September xx, 2019

# What are arrays?

Arrays are another way to store data. In a nutshell, an array contains a series of variables that are labelled with numbers from 0 to some number  $n$ .

# What are loops?

Loops are dsabdsadjava fds fds

```
for i in range(0,100):  
    print(i)  
    x = i + 1
```
